Business Improvement

- Do you feel that you spend too much time working in the business rather than on the business?
- Would you like to look at the strategic options open to you and your business?
- Do you need to re-focus your business and provide a change of direction?
- Do you need a sounding board to evaluate your ideas or do you just need to talk?

OR

- Would you just like to be making a little more profit from your efforts?

If the answer to any of these questions is **yes** then SG Outsourcing can help.

As part of the SG Outsourcing team Ian Stocks provides business improvement solutions to clients.

Ian joined Smailes Goldie Group with a wealth of experience working in the SME sector where he had been a professional for a major bank for over 30 years.

Ian will get to know your business through a mix of financial analysis, sector knowledge and a thorough non-financial fact find. Understanding the aims of the business and its owners at this stage is key.

Ian will then work with you and your team to develop a real and deliverable plan of action to get your business moving towards your goals.

You can set the pace of the process to fit in with your other commitments and we can support you for as little or as long as your needs dictate. Being part of the Smailes Goldie Group we can provide expertise across a wide range of areas but if your needs are more specific we also have local contacts covering many other disciplines.

The next step is to contact your partner or Ian direct to discuss your individual requirements and book an initial free exploratory meeting.
